

OzCLO 2022

Australian Computational and Linguistics Olympiad

OzCLO is a language puzzle-solving competition for students in years 9-12.

No linguistic knowledge necessary, however it's great for students who like languages, maths, computers and natural sciences.

National winners will compete in the International Olympiad online or offline in Castletown, Isle of Man!

Try your hand at a puzzle right now!

Below are some English words written in Braille, an alphabet made of raised dots for blind people to read with their fingers.

We'll tell you what five of the words are:

door, ware, rare, deer, dare

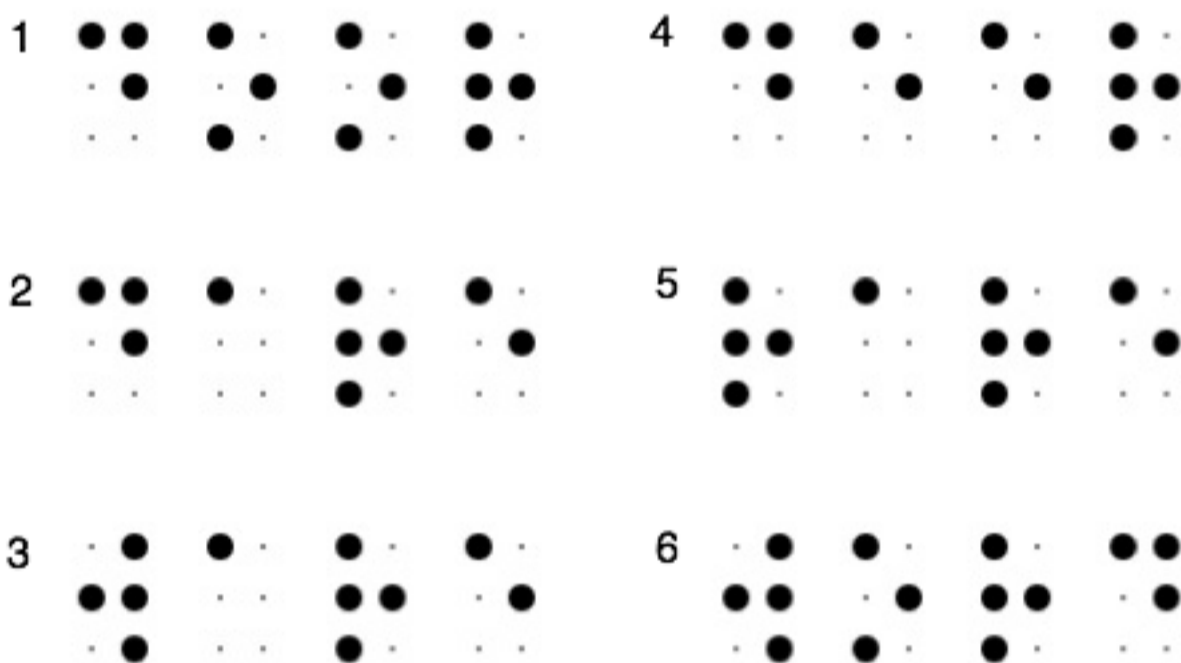

Match the word and the Braille spelling – and then you can figure out what the sixth word is!

Can't get it? That's OK, the answer is at the bottom of the poster!

If you enjoyed that you'll love:

Australian Computational and Linguistics Olympiad

Competition Regional and National Rounds:

Regional: 2 March 2022

National: 23 March 2022

Registration: www.ozclo.org.au
