

# OzCLO 2023

## Australian Computational and Linguistics Olympiad

OzCLO is a language puzzle-solving competition for students in years 7-12.

No linguistic knowledge necessary, however it's great for students who like languages, maths, computers and natural sciences.

The National winning team will compete in the International Olympiad in person in Hungary!

Try your hand at a puzzle right now!

Below are some English words written in Braille, an alphabet made of raised dots for blind people to read with their fingers.

We'll tell you what five of the words are:

*door, ware, rare, deer, dare*

Match the word and the Braille spelling – and then you can figure out what the sixth word is!

Can't get it? That's OK, the answer is at the bottom of the poster!

If you enjoyed that you'll love:

Australian Computational and Linguistics Olympiad

### **Competition Regional and National Rounds:**

Regional: 1 March 2023 online

National: 22 March 2023 in person

Registration: [www.ozclo.org.au](http://www.ozclo.org.au)
