

Talented students in senior and junior secondary school who enjoy solving puzzles and who have a knack for logic and languages are invited to test their minds against fiendish and fun linguistic problems in the **twenty-eighth Australian Computational and Linguistics Olympiad (OzCLO)**.

Students who have a keen interest in English, languages, maths or computing are a good match for the competition.

OzCLO is an exciting **team-based national competition** which challenges students to solve fascinating puzzles in real languages. Students work together in teams of four on a range of analytical problems. The top three teams for each State and Territory in Round 1 will go through to Round 2. The winners of Round 2 are offered the opportunity to represent Australia at the International Linguistics Olympiad (IOL), which will be held 21-26 July 2025 in Taipei.

There is a **training package** and **past problems with solutions** available for

schools plus lots of other information on the OzCLO website: [www.ozclo.org.au](http://www.ozclo.org.au).

The **Australian Computational and Linguistics Olympiad (OzCLO)** has been held at universities around Australia since 2008, now with over 2500 students competing each year. The competition is coordinated by a team of linguists at several Universities in Australia.

#### **Competition dates**

Round 1: 5 March 2025 (online)

Round 2: 26 March 2025 (in person)

#### **Registration**

22 January – 28 February 2025

\$40 per team

<https://ozclo.org.au/registration/>

**More details on the website:**

[www.ozclo.org.au](http://www.ozclo.org.au)

Students in years 11 and 12 will be eligible to enter the Senior competition, and students in years 7 to 10 will participate in the Junior competition. Registrations should be made and managed by the school. Individuals can contact us for assistance to find a team.

**Do your students enjoy  
solving problems and  
cracking codes?**
